

Indicator 17: Occupational Health and Safety Professionals

Significanceⁱ

Physicians with training and/or special interest in occupational medicine provide primary, secondary and tertiary occupational health preventive services. In 1989, the American Medical Association recommended that there be one occupational health physician for every 1,000 employees. Occupational health nurses provide a great deal of onsite occupational health care. Industrial hygienists and safety professionals are typically the primary individuals responsible for evaluating workplaces and making recommendations to prevent occupational injuries and illnesses.

Occupational safety and health professionals prevent workplace injuries and illnesses through exposure/hazard identification and prevention. An adequate number of professionals in the fields of occupational medicine, occupational health nursing, industrial hygiene and safety are needed to ensure safe workplaces.

Methods

The number of professionals and rate per 100,000 employees in Colorado for 2003 to 2010 are reported using data from the American College of Occupational and Environmental Medicine (ACOEM), American Association of Occupational Health Nurses (AAOHN), American Industrial Hygiene Association (AIHA), American Society of Safety Engineers (ASSE) and Bureau of Labor Statistics (BLS) Current Population Survey (CPS). Data from 2011 and on is not currently available. The BLS CPS data on employment numbers are used to calculate rates.

Data Sources

State and United States data provided by the Council of State and Territorial Epidemiologists (CSTE), calculated using the following:

- American Board of Preventive Medicine (ABPM) diplomats database (www.abprevmed.org) (numerator)
- Annual roster of members of the American College of Occupational and Environmental Medicine (ACOEM) (www.acoem.org) (numerator)
- American Board of Occupational Health Nurses (ABOHN) Directory (www.abohn.org) (numerator)
- Annual roster of members of the American Association of Occupational Health Nurses (AAOHN) member directory (www.aaohn.org) (numerator)
- American Board of Industrial Hygiene (ABIH) (www.abih.org) (numerator)
- American Industrial Hygiene Association (AIHA) member directory (www.aiha.org) (numerator)
- Board Certified Safety Professionals (BCSP) member directory (www.bcsp.org) (numerator)
- American Association of Safety Engineers (ASSE) member directory (www.asse.org) (numerator)
- Bureau of Labor Statistics (BLS) Current Population Survey Data (CPS) (denominator)

Denominator: Bureau of Labor Statistics Geographic Profile of Employment/Unemployment (GP) or Current Population Survey (CPS)

**Data not available for AAOHN members for 2010*

Limitations

- Other occupational safety and health fields are not included, such as health physics, ergonomics and occupational health psychology.
- Member lists include retired and part-time professionals and may not be mutually exclusive (i.e., members of the AIHA may also be members of ASSE). These factors may result in an overestimate of the number of active occupational health and safety professionals.

Recommendations and Next Steps

- Increase the number of students in the occupational safety and health field who are trained and employed in Colorado. Colorado has far less than the recommended number of occupational health physicians per employed workers.
- Explore methods to describe the financial benefits of investing in occupational health and safety professionals to ensure a stable and healthy workforce at every level.
